

# Supporto a soffitto per 3 schermi TV 32"-65" Altezza 86-325 cm

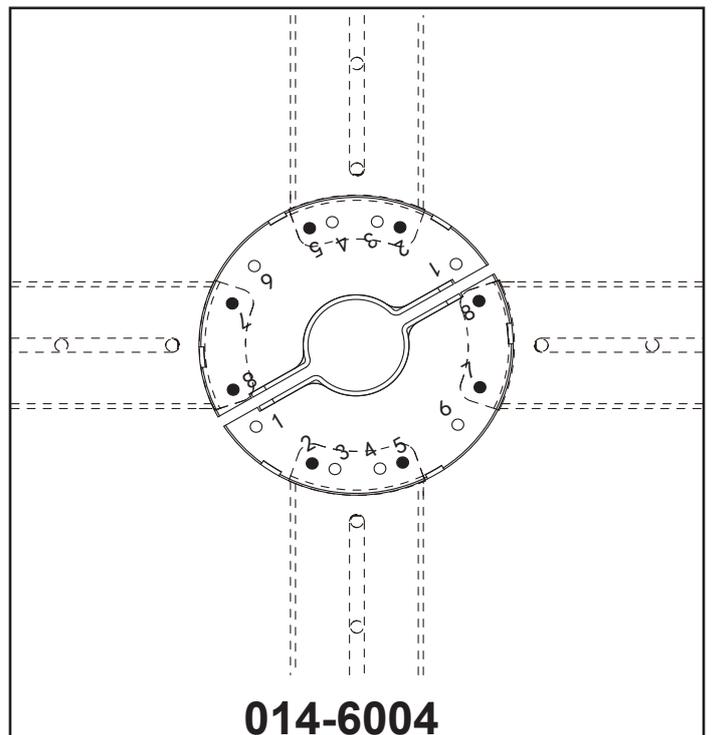

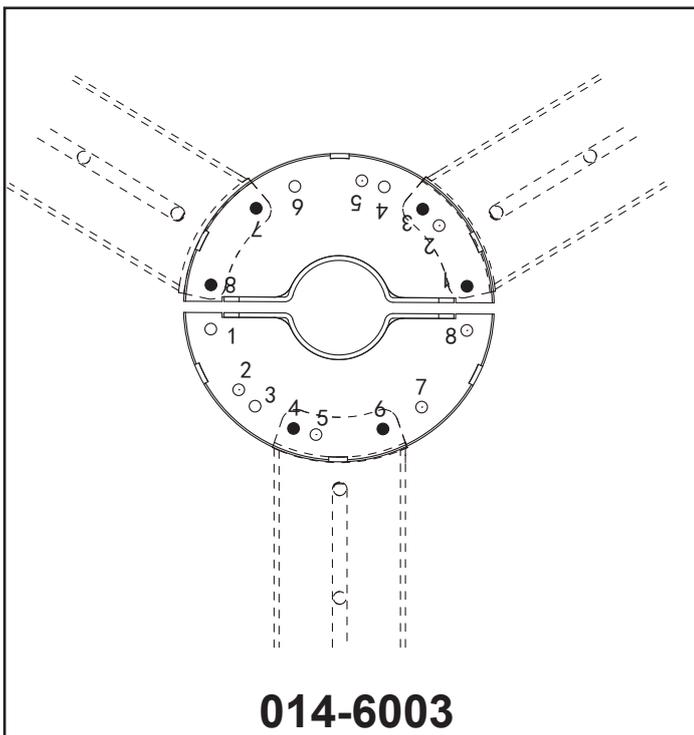

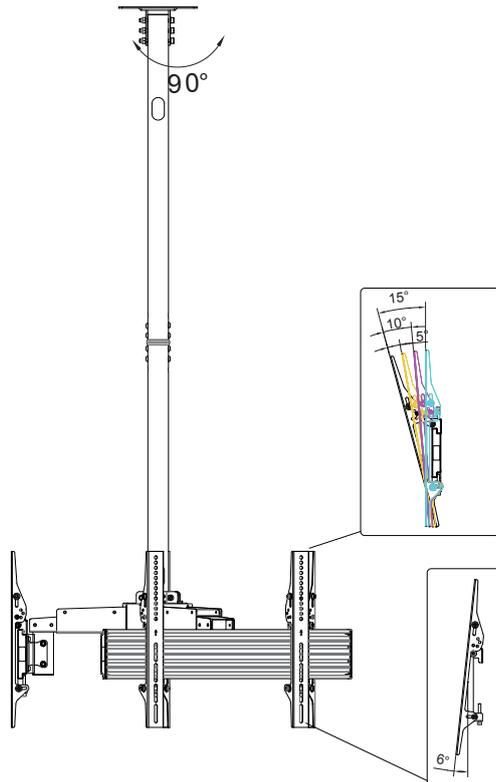

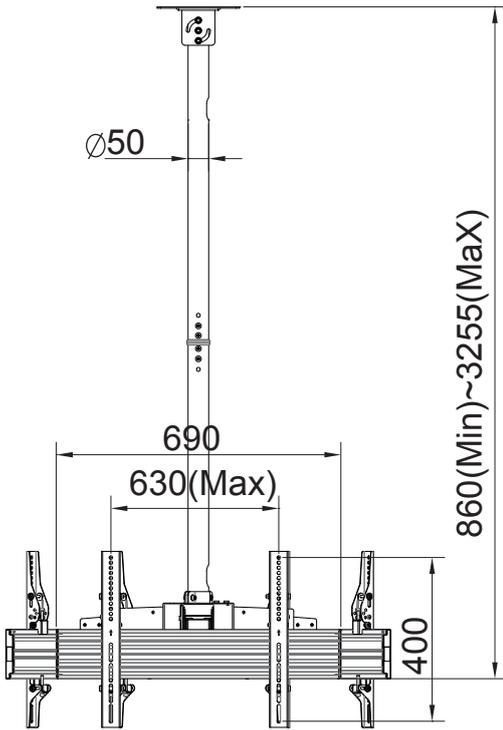

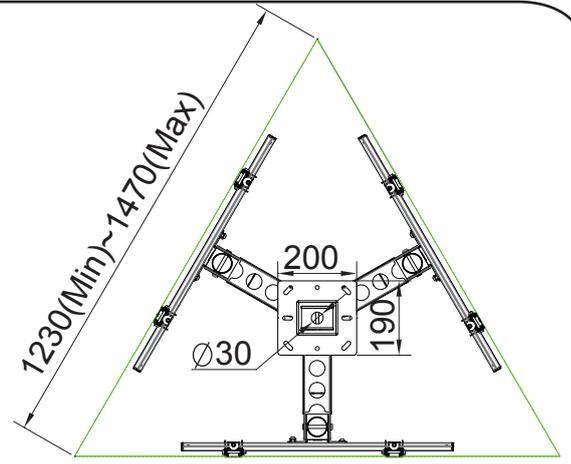

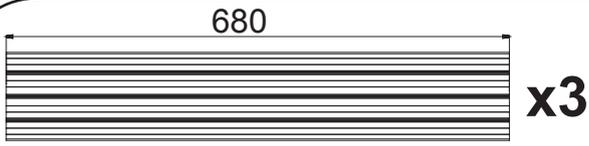

014-6003

## MANUALE DI MONTAGGIO

# Dimensioni (mm)

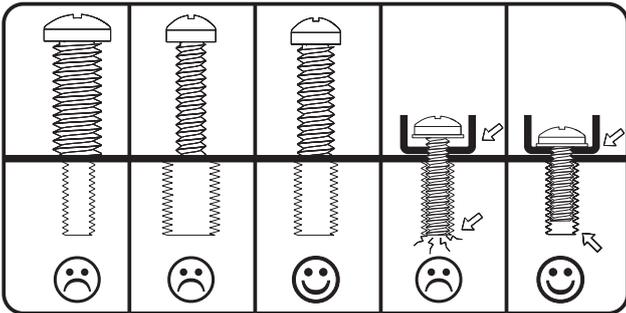

Il peso massimo di carico è di 30 kg per schermo. Questo supporto è destinato all'uso solo con i pesi massimi indicati. L'uso con prodotti di peso superiore a quello massimo indicato può causare instabilità con conseguenti lesioni. Anche la parete a cui intendi fissare il supporto deve essere in grado di supportare più di 5 volte il peso della TV e del supporto combinato.

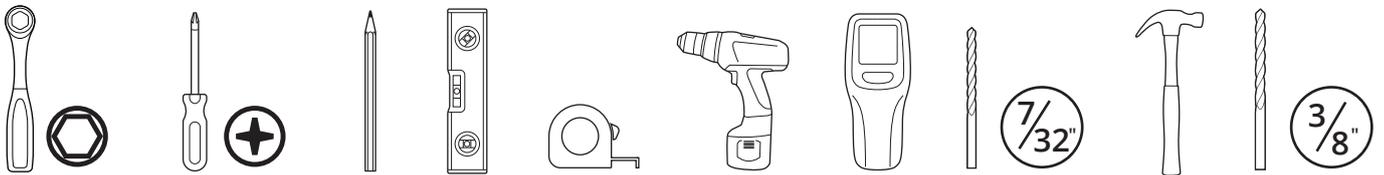

Non utilizzare questo prodotto per scopi diversi dal montaggio di un televisore compatibile VESA su una superficie verticale come indicato in questo manuale. Un'installazione impropria può danneggiare il televisore o causare gravi lesioni. Questo prodotto non deve essere montato su pareti con montanti in acciaio o pareti di blocchi di calcestruzzo. Consulta un installatore qualificato se non sei sicuro del tipo di parete che potresti avere.

## Selezionare le viti adatte al tipo di TV

La parte posteriore della TV ha 4 fori per le viti in uno schema quadrato o rettangolare. Qui è dove il supporto si collegherà alla tua TV. Offriamo diverse dimensioni e lunghezze delle viti. Questa guida ti aiuterà a selezionare le viti corrette per la tua TV. Utilizzerai solo 4 delle viti in dotazione per fissare la tua TV - il resto non è necessario.
